

Senion at Work

Senion at Work is a hybrid office resource planning tool that helps employees boost productivity and enables dynamic allocation of work space and desks.

Hybrid Office Solutions:

- Built on Senion's world class Indoor Positioning System and backed by Verizon
- Find, book and cancel work spaces in real-time
- Indoor wayfinding and navigation
- Auto cancellation of ghosted meeting rooms
- Utilization rates and occupancy for spaces
- Plan in-office attendance and smart meetup with colleagues

Senion at Work

Boost critical business metrics

Increase Productivity

Facilitate collaboration with location, and never spend another minute looking for a colleague or a conference room.

Boost Employee Experience

Attract and retain top talent by reducing friction to make every day at the office a little simpler.

Contain Real Estate Costs

Most offices are vastly underutilized, which means paying for something you don't use.

The future of work is complex. Senion makes it simple:

Complete Integrated System

Senion at Work is a comprehensive solution. Every component has been engineered to work in synergy and integrate with your existing productivity tools, including Microsoft Office and G Suite.

Seamless Installation

Our team creates a customized plan for your unique office space and provides white glove end-to-end installation services.

A Simple, Proactive User Experience

Senion at Work is an easy-to-use tool, leveraging localized positioning to help employees proactively plan in-office attendance, connect with colleagues and enable smart utilization of spaces.

Long-Term Solution

Senion's Indoor Positioning System backed by Verizon. The platform is flexible and reliable, enabling future hybrid office applications.
